

LET YOUR VOICE BE HEARD ! HELP PHARMACY SURVIVE

Every day our legislative council and legislative team works to ensure that the attacks against pharmacy don't go unanswered.

The 82nd session of the Texas Legislature provides independent pharmacists with enormous challenges. We need an increase in Medicaid dispensing fees to help maintain our bottom line because of actions by the federal government. We must have mail order parity and PBM regulation to ensure a level playing field in filling prescriptions.

There are moves to continue efforts to legalize drug imports from foreign countries. **NEVER HAS IT BEEN MORE IMPORTANT to meet our challenges head on.**

The **PHARMACY SURVIVAL FUND** has consistently been the leader in making sure that our voice is heard. **WE MUST NOT BE SILENT NOW!** The Pharmacy Survival Fund was established in December 2002 when the Texas Health and Human Services Commission was on the brink of implementing a new reimbursement formula that would have had devastating effects for providers in the Vendor Drug Program. TrueCare played an instrumental role in garnering support to legally challenge those rules by establishing the fund to help pay the costs of the impending lawsuit. As a result, all pharmacies in Texas benefited.

Now, as during past legislative sessions, **TrueCare is on the front lines fighting to protect the interests of independent pharmacists across this state and nation.** The Pharmacy Survival Fund helps promote grassroots efforts to educate legislators, opinion makers and the general public on issues important to independent pharmacy. It has been instrumental in funding the monitoring and formulation of pharmacy positions on many issues concerning the state's Medicaid program. It has provided marketing, public relations and information for independent pharmacy on issues ranging from mandatory mail order to changes in the Medicare and Medicaid programs.

Because of those efforts, pharmacy has enjoyed many successes. This success could be short lived if efforts to make our voice heard are silenced.

YES, I WANT TO HELP PHARMACY SURVIVE.
